

Miata ND and Fiat 124 installation guide

RedlineGoods sun visor covers

Right hand cover, for left hand one the same procedure except mirror image.
Note the Velcro tab is in the back and the smaller cutout is towards the door.

1. Slide the cover on the door side until the end fits snugly and the cutout lines up with the hinge.

2. Slide the other side on (larger cutout).

3. Wiggle back and forth to make it nice and straight and aligned with the sun visor.

4. Push the visor up and slide the Velcro tab in between the visor and the car body.
5. The tab can be seen on the left. Pull through all the way across to straighten and tighten the fit.

6. Fasten the tab to its corresponding Velcro strip on the cover and done. May require a little sliding near each seam to get the perfect fit.
